ABOUT ME

Data Science postgraduate with strong skills in SQL, data analysis, and statistical modeling. Experienced in transforming raw data into actionable insights through data querying, exploratory analysis, and dashboard development. Proficient in Python and AI/ML techniques, with experience in NLP and LLM-based systems. Passionate about solving business problems using data-driven storytelling.

EDUCATION

MSc in Data Science, Christ University, Bengaluru 2024–2026
CGPA: 3.52

BSc in Statistics, Assam University, Assam 2020–2023
CGPA: 8.80

WORK EXPERIENCE

Product Developer Intern Feb 2026 – March 2026

GenLab, Nagercoil, Tamil Nadu

- Analyzed user interaction data from chatbot systems to identify patterns and improve response effectiveness
- Queried and processed backend data using MongoDB and APIs to support data-driven feature improvements
- Built reporting workflows to monitor system performance and communicate insights to product stakeholders

Data Science Intern May 2025 – June 2025

SaiKet Systems, Virtual

- Wrote queries and performed data cleaning and transformation to prepare datasets for analysis
- Conducted exploratory data analysis to identify trends and patterns in real-world datasets
- Created visual reports and dashboards to communicate insights and support business decision-making

PROJECTS

NutriSage: AI-Powered Nutrition Assistant [GitHub](#)

- Extracted and structured nutrition data from raw inputs to create analysis-ready datasets
- Implemented semantic search and data retrieval using SBERT embeddings and FAISS over 10,000+ records
- Generated insights and responses using NLP and RAG techniques to support user decision-making

Market Drivers Analysis of Nifty 50 (Econometrics Study) [GitHub](#)

- Analyzed financial data using regression techniques to identify key factors influencing market trends
- Performed statistical diagnostics and validation (VIF, residual analysis) to ensure reliability
- Translated analytical results into clear, business-oriented insights for decision-making

AttriNet: Predictive HR Attrition Intelligence [GitHub](#)

- Analyzed employee data to identify key drivers of attrition trends
- Built an interactive Streamlit dashboard to visualize insights for HR stakeholders
- Translated model outputs into actionable recommendations for workforce decision-making

SKILLS

Programming: Python, SQL

AI & Machine Learning: Machine Learning Algorithms, Deep Learning, Neural Networks, NLP, Computer Vision, Generative AI

Frameworks & Libraries: PyTorch, TensorFlow, Keras, Scikit-learn, NumPy, Pandas

Data Handling & Analysis: Data Cleaning, Data Transformation, Exploratory Data Analysis

Databases: MongoDB, FAISS (Vector DB)

Tools & DevOps: Git, GitHub, Docker, Postman

Cloud Platforms: AWS(Basic)

Advanced AI Concepts: LLMs, Prompt Engineering, RAG, LangChain, SBERT, LLM APIs (OpenAI, Groq)

ACCOMPLISHMENTS

- Gold Medalist: BSc Statistics (Honours), Gurucharan College (2023)
- Publication: Enhancing Time Series Forecasting in Low-Liquidity Markets using GANs, ICAAIC 2025 (IEEE)
